VILLAGE PROFILE QUESTIONNAIRE

INFORMED CONSENT AND INTRODUCTION

[Interviewer Flag] Informed consent: It is necessary to introduce the village leaders to the survey and obtain the consent of all prospective respondents to participate. If a prospective respondent (e.g. a woman decision maker) is not present at the beginning of the interview, be sure to return to this page and obtain consent before interviewing him or her. Ask to speak with an important person in the village.

[Interviewer Read]

Hello. My name is _____ and I am from Myanmar Survey Research and today we are in this village conducting a survey on behalf of the Livelihoods and Food Security Trust Fund, or what is known as LIFT. LIFT supports numerous livelihoods and food security projects throughout rural Myanmar.

[Interviewer flag: If it is the first time the village participates in the survey, read:]

We are conducting a survey about rural livelihoods, opportunities, challenges and needs, and about rural development activities throughout Myanmar. Thus, we would like to ask about your village's livelihood activities. This information will be used to find out what kind of rural development programmes are working well and not so well and how they might be improved throughout Myanmar.

[Interviewer flag: If the village has already participated in the LIFT survey, read:]

As you know, your village has already participated in this survey about two years ago. We would like to thank your village at this point for your past participation in the survey. The information you have provided last time has helped LIFT to understand the impact of its programmes and has helped to improve LIFT support all over the country. LIFT would like to have an update on the conditions of the livelihood activities in your village. Your information is very important for LIFT to understand if and how the situation of your village has changed over the last two years.

[Interviewer flag: Continue for both villages that have never participated and that have participated in the past]

Your participation is completely voluntary, meaning that you do not have to participate in the survey if you don't want to.

Please understand that there are no right or wrong answers to the questions and we ask for your honest answers. All of the answers you give will be confidential and will not be shared with anyone other than the research team. In addition, we will not report the results of individuals and, instead, the information of all the village leaders will be summarized together. This way, no one will be able to identify the information that comes from you.

If I ask you any questions that you do not want to answer, just let me know and I will go on to the next question. Also, feel free to stop the interview at any time. The interview should take

a little more than one hour. If you don't have time to finish all the questions now, we can return later.

Do you have any questions related to our study or about your participation? In case you need more information about the survey, you may contact the person listed on this card.

[INTERVIEWER: GIVE CARD WITH CONTACT INFORMATION]

Do you have any questions about the study or about your participation?

[INTERVIEWER: ASK THE FOLLOWING CONSENT QUESTIONS OF ALL PROSPECTIVE RESPONDENTS. AS APPLICABLE, CHECK AND SIGN THE CONSENT BOX BELOW.]

[NAME], do you agree to participate in the survey?

INTRODUCTIO AND INFORMED CONSENT

INSTRUCTIONS: Enumerators must introduce the household to the survey, identify respondents and obtain the consent of all prospective respondents. If a prospective respondent (e.g. a woman decision maker) is not present at the beginning of the interview, be sure to return to this page and obtain consent before interviewing him or her. Ask to speak with a responsible adult in the household.

IDENTIFYING RESPONDENTS:

For **panel survey** please follow up with the person who responded last time. For new participants follow instructions below.

- (A) **PRIMARY RESPONDENT FOR HH QUESTIONNAIRE AND EXPENDITURE MODULE:** The main respondent must be over 18 years of age and must be the person in the household who earns the main income and knows most about the household, including information on household members, economic activity, and farming. Usually the respondent will be the head of household. If he or she is ill, elderly or away from the household and cannot be reached in three attempts during the household survey visit, a de facto household head such as a spouse or adult household can be used as respondent. The head of hh or the person identified as de facto head of hh has to be a living member of the hh and determined by the hh members themselves. The respondent can be male or female.
- (B) **SECONDARY RESPONDENT FOR HH QUESTIONNAIRE AND EXPENDITURE MODULE:** A spouse or other person responsible for food preparation and/or shopping may be identified to answer section 8 on household dietary diversity and parts of the expenditure module.
- (C) **RESPONDENTS FOR CHILD NUTRITION QUESTIONNAIRE:** Respondents should be all mothers or other main caretakers of children under the age of 5 within the household. Questions about breastfeeding and woman dietary diversity score need to be answered by biological mothers.

INFORMED CONSENT

Hello. My name is _____. I am working with MSR. We are conducting a survey funded by LIFT, which aims at learning about rural livelihoods in Myanmar as well as any programs and assistance taking place in this area. You may have been interviewed by our team one or two years ago in which case this is the follow up to that visit.

We are interviewing over 7,000 households in 446 villages across Myanmar. Sixteen households in each village have been selected randomly. Your household is among those selected and we would like to ask you as head of the household or spouse some questions about your household and its livelihoods and food situation. We would also like to measure the height and weight of any children under 5 years of age in your household. In total, the questions should take about 60 minutes of your time.

Your information will help understand the needs and challenges of rural households and will help LIFT and other organisations know how best to provide support. We ask for your open and honest information. All of the answers you give will be confidential and will not be shared with anyone other than members of a small research team. The information collected will be summarized for all of the households interviewed and your individual response will not be identifiable. The results will be presented to LIFT partners, donors and the Government of Myanmar.

We will greatly appreciate your participation as your views are important. However, you do not have to participate and if I ask you any question you don't want to answer, just let me know and I will go on to the next question. You are also free to stop the interview at any time. In case you need more information about the survey, you may contact the person listed on this card.

We can return later today if you don't have time to finish all the questions now.

GIVE CARD WITH CONTACT INFORMATION

Do you have any questions about the study or about your participation?

INFORMED CONSENT AND INTRODUCTION

Informed consent: ENUMERATORS MUST INTRODUCE THE HOUSEHOLD TO THE SURVEY, IDENTIFY RESPONDENTS AND OBTAIN THE CONSENT OF ALL PROSPECTIVE RESPONDENTS. IF A PROSPECTIVE RESPONDENT (E.G. A WOMAN DECISION MAKER) IS NOT PRESENT AT THE BEGINNING OF THE INTERVIEW, BE SURE TO RETURN TO THIS PAGE AND OBTAIN CONSENT BEFORE INTERVIEWING HIM OR HER. ASK TO SPEAK WITH A RESPONSIBLE ADULT IN THE HOUSEHOLD.

Hello. My name is _____. I am working with MSR. We are conducting a survey funded by LIFT, which aims at learning about rural livelihoods in Myanmar as well as any programs and assistance taking place in this area.

We are interviewing households in 446 villages across Myanmar. The households in each village have been selected randomly. Your household is among the households selected in your village and we would like to ask you as head of the household or spouse some questions about your household and food situation. We would also like to measure the height and weight of any children under 5 years of age in your household and take the Mid Upper Arm Circumference of the biological mother of these children. In total, this should take about 20 to 30 minutes of your time.

Your information will help understand the needs and challenges of rural households and children and will help LIFT and other organizations know how best to provide support. We ask for your open and honest information. All of the answers you give will be confidential and will not be shared with anyone other than members of a small research team. The information collected will be summarized for all of the households interviewed and your individual response will not be identifiable. The results will be presented to LIFT partners, donors and the Government of Myanmar.

We will greatly appreciate your participation as your views are important. However, you do not have to participate and if I ask you any question you don't want to answer, just let me know and I will go on to the next question. You are also free to stop the interview at any time. In case you need more information about the survey, you may contact the person listed on this card.

We can return later today if you don't have time to finish all the questions now.

[INTERVIEWER: GIVE CARD WITH CONTACT INFORMATION]

Do you have any questions about the study or about your participation?
